IN THE SPECIFICATION

A marked-up version of the Please amend the Specification as follows. "SPECIFICATION MARKED-UP TO Specification is attached in APPENDIX A: SHOW CHANGES MADE".

At page 4, please insert the following starting at line 8:

Generally, bulky ligand transition metallocene-type catalyst compounds include half and full sandwich compounds having one or more bulky ligands including cyclopentadienyl structures or other similar functioning structure such as pentadiene, cyclooctatetraendiyl and imides. The bulky ligands are capable of .eta.-5 bonding to a transition metal atom, for example from Group 4, 5 and 6 of the Periodic Table of Elements. Non-limiting examples of catalyst components and catalyst systems are discussed in for example, U.S. Pat. Nos. 4,530,914, 4,871,705,
